

## **FX SCALPER X**

FX SCALPER X is a hybrid EA that can be used for short term gains/withdrawals and also can be used as a long term EA to compound/grow your money. This EA is gains on auto pilot! We will start giving away profits generated by this EA on a weekly basis to members of our public telegram channel starting soon!

**Telegram Channel:** <https://t.me/FXSCALPERX>

**Minimum Starting Balance:** 100

**Recommended Starting Balance:** 500+ The more you can start with the better

**Leverage:** At least 1:300 (1:500 recommended)

**Account Type:** Compatible with any account type but zero/raw spreads account is recommended for optimal results

**Recommended Pairs:** EURUSD - GBPUSD - EURGBP - AUDUSD - USDCAD

Note: This EA has the potential to trade any pair but these are our recommended pairs and the best pairs we have found and the only pairs that we use currently. If you want to venture out and try other pairs, that is entirely up to you.. However if you venture out and use other pairs and your results are negative that is entirely on you.. We have nothing to do with that. (this EA has the potential to trade any pair if you guys find any other good pairs feel free to let us know.. We will do the same)

**Time Frame:** This EA is a multi-time frame, attach it to any time frame to start off and it will automatically adjust.. (See youtube video below for example)

**Chart Installation:** <https://youtu.be/-I3i4VOp8kw>

(Must install the EA on every pair that you're going to use (time frame doesn't matter)

**Settings:** The default settings are already optimized. The only settings that you should edit are:

**Use\_AutoLot:** This is the automatic lot sizes setting. When true automatic lot sizes is on. When false automatic lot sizes are off. We recommend leaving this on its already optimized for our recommended usage of the EA.

**Risk\_Mode:** The risk level for the automatic lot size setting. You have 3 different levels to choose from low, medium, high. Staying on low is recommended, but it's up to you at the end of the day.

**Trade LotSize:** This is the fixed lot size setting. To use fixed lot size `Use_AutoLot` must be set to false. After you set `Use_AutoLot` to false input your desired lot size in the `Trade LotSize` setting

**Stop Trading When Equity Goes Below This Value:** If your equity falls below whatever number you put here the EA will automatically close all positions and shut off

=====

### RECOMMENDED USAGE

ACCOUNT BALANCE	PAIRS	LOT SIZE
100-500	Select 1 of the recommended pairs  (no need to message us asking "which pair should I select?" They are all recommended just select your preferred pair from the list provided)	0.01  (having auto lot sizes on will automatically calculate this)

92,000-94,000	All recommended pairs	0.46  (having auto lot sizes on will automatically calculate this)
94,000-96,000	All recommended pairs	0.47  (having auto lot sizes on will automatically calculate this)
96,000-98,000	All recommended pairs	0.48  (having auto lot sizes on will automatically calculate this)
98,000-100,000	All recommended pairs	0.49  (having auto lot sizes on will automatically calculate this)

## **BACKTESTER REPORTS**

FX SCALPER X cannot be accurately backtested because it relies on multiple pairs being traded simultaneously.. MetaTrader4 Doesn't allow us to backtest multiple pairs at the same time!

=====

## **BEST TRADING CONDITIONS FOR NON US RESIDENTS**

### **EUROTRADER ZERO ACCOUNT:**

<http://t.eurotrader.com/?t=erHcTa>

Eurotrader has very low spreads with \$5.5/Lot commissions. These trading conditions are very hard to beat.. Therefore they are the recommended broker for non USA residents.
